PROFILE

Highly skilled Full Stack Web Developer with expertise in frontend development. Proficient in JavaScript (ES6+), React.js, Next.js, Svelte, and WordPress. Strong understanding of HTML5, CSS3, and responsive design principles. Experienced in building dynamic and user-friendly web applications using modern web development frameworks and tools.

Possesses knowledge of backend technologies such as Node.js, Express.js, MongoDb and SQL databases. Collaborative team player with a passion for creating exceptional user experiences. Seeking a mid-senior level web developer role to contribute to the development of innovative and impactful web solutions.

TECHNICAL SKILLS

JavaScript

Node.js

TypeScript

Next.js

Express.js

jQuery

HTML5

EXPERIENCE

Software Engineer
Noria Water Technologies - Los Angeles, California
Jan 2023 – Jul 2023

- Led the development of dynamic webpages for the company's WordPress site, creating custom WordPress themes from scratch using PHP.
- Enhanced the RO-Spotlight™ digital dashboard, specifically the documentation page, using Tailwind CSS and Next.js to improve user experience and added new functionalities.
- Fostered a collaborative development environment by coordinating with the lead developer on GitHub, aligning project progress with the overall development strategy, and ensuring efficient version control.
- Implemented a responsive design approach for both projects, ensuring optimal viewing experience across various devices and screen sizes.
- Demonstrated strong proficiency in the modern web development stack, including WordPress, PHP, Git/GitHub, Next.js, and Tailwind CSS, while staying up-to-date with industry trends.

Software Engineer
GeSvelte | Los Angeles, California
Feb 2022 – Jan 2023

- Developed and maintained custom Svelte components in TypeScript, ensuring adherence to W3C A11Y standards (WCAG and ARIA) and increased component reusability by 60%.
- Combined SCSS and atomic CSS to create highly styled and themed components tailored to project requirements, resulting in a 75% enhancement in project customization.
- Opted for migrating the codebase from JavaScript to TypeScript to leverage the benefits of static typing, ensuring stronger type safety for complex form configurations and facilitating enhanced developer productivity during code maintenance and collaborative development.

Code review

Project management

- Led sprint planning, managed the backlog, and facilitated daily stand-up meetings to streamline project management processes.
- Utilized Svelte Kit's layout API and parameter-based routing systems to create a cohesive interface with modularity, eliminating the need for manual server configuration and external libraries for generating REST API endpoints.

Lead Software Engineering Instructor
Riverside Community College | Riverside, California
Jan 2018 – Feb 2022

- Taught computer science principles, programming languages such as JavaScript, Python, and C++, and data structures and algorithms to students.
- Equipped students with a strong foundation in computer science concepts and nurtured their critical thinking and problem-solving skills.
- Provided code review and feedback to students, helping them improve their coding skills and adopt engineering best practices.
- Collaborated with students to build multiple low to mid-level applications using JavaScript, C++, and Python.
- Created engaging and interactive learning materials, including lectures, assignments, and projects, to facilitate hands-on learning experiences for students
